

KNIGHTS OF LABOR IN POLITICS.

Grand Master Workman Sovereign proposes using the Knights of Labor in politics. In a recent address he says a struggle is being waged between two great forces. Organized monopolies are endeavoring to make slaves out of men. Oppulence is fast becoming monarchical. Distributive production is dying out, and combinations of money and brains are fast reducing independent operators to mere wheels in the machinery of vast manufacturing concerns.

"I appeal to you," he says, "to rally to the rescue. Under the shield of our noble order we will also bring great avenues of distribution, within easy reach of the masses. Elect all legislative, executive and judicial officers of the Government, take away the veto power of the President and destroy the avocation of corrupt lobbies by establishing the initiative and referendum. Thus we will give to the world our industrial system menaced by no tramp at one end and no princely dude at the other."

This address indicates that the Knights will take a hand in politics and make their power felt at the polls. It would be more satisfactory, however, if it stated how combinations of money and brains in manufacturing concerns are to be supplanted and great avenues of distribution brought within easy reach of the masses. The election of all officers by the people and depriving the President of the veto power may be a step in the right direction, but will it increase the number of independent operators? Establishing the initiative and referendum will doubtless result in more equitable legislation, as the people would then determine what laws should stand, but it will take years to bring about the change, as the Constitution of the United States and of every State in the Union would have to be amended.

Grand Master Workman Sovereign, as he leads the Knights into politics, should advise them as to the best course to pursue on the financial and economic questions now before the public. While he emphatically declares for reforms, which, under the most favorable conditions, cannot be brought about for years, he is silent on the great issues now before the public. He does not say whether he believes in the adoption of the gold standard or the free coinage of silver. Neither does he intimate what action the Knights should take on the tariff question, and if an election was to be held to-morrow his followers could not determine from his address whether their interests would be best sub-served by casting their ballots for a silver man or a gold-bug.

THE WILSON TARIFF BILL.

The tariff bill presented by the Ways and Means Committee of the House of Representatives will be reported to the House next Wednesday and the debate will begin the following Monday. There is some opposition to the bill on the Democratic side of the House, but it will probably pass that body with slight amendments. The Democratic members of the Senate Finance Committee, however, do not favor the bill, and they have decided that a comparative statement should be made which will show the difference between the present law and the new bill. It is said to be within the range of possibility that the principles of free raw material may be abandoned or at least materially modified. Representatives of manufacturing interests are appearing before the committee and giving their opinions of the proposed changes.

The fact that the expenditures of the Government exceeded the receipts over \$7,000,000 in November and about \$30,000,000 in the last six or eight months causes Senators and Representatives to pause ere they materially increase the free list. A material reduction of the duties on imports will result in a decrease of the revenue from that source, and a deficiency will be the inevitable consequence, unless provision is made for increasing the revenue from other sources than the custom houses.

Some of the advocates of the Wilson bill contend that reducing the tariff on certain articles will increase the importation of such articles and that therefore there will be no perceptible falling off in the revenue from customs duties. This falling off they propose meeting by a tax on all incomes exceeding \$5,000 a year.

There may be a wide difference of opinion between the House Committee on Ways and Means and the Senate Finance Committee on the tariff, and if there should be, a compromise measure will have to be adopted if a tariff bill is passed before next July, the time fixed for the Wilson bill to go into effect.

C. P. HUNTINGTON, President of the Southern Pacific company, has been awarded the contract for building three new gunboats for the Navy Department. The bid is \$280,000 for each boat. The boats are to be 220 feet long, 36 feet beam and of 1,261 tons displacement and 14 knots speed. They are to be built by the Newport News Company, a Virginia corporation of which Mr. Huntington is the principal stockholder.

More pension frauds have been discovered at Chattanooga and New Orleans. Dr. M. N. Thompson, who was at one time Examining Surgeon of the Bureau, but dropped from the Board three years ago, is engaged in the swindling operations.

BOLD BANK ROBBERS.

They Secure \$15,900 in Broad Daylight.

TRAMPS INSIST UPON RIDING.

An Illinois Crank Trying to Organize an Army.

THE TRAMPS OBJECT.

The Southern Pacific Order Likely to Cause Trouble.

TUCSON, A. T., December 8.—The orders from Southern Pacific headquarters that no tramps shall be allowed free passage on freight trains is likely to result in damage to the road and possible bloodshed. At Lordsburg, 160 miles east of here, a gang of 135 tramps are now camping, where left when the orders came. They are an ugly lot and tell the trainmen that if not allowed to move on eastward they will derail a passenger train. They are comfortably camped, burning coal from the cars there.

Last night they removed seventeen tons of coal from the cars, piled it in a huge circle, fired it and unconcerned themselves within, passing the night in comfort.

Tramps have of late been moving in both directions, going west as well as east. One gang of forty going through yesterday were so dangerous that trainmen did not eject them. They got on at El Paso, riding in a car of straw destined for another road. At the junction, Benson, forty miles east of here, the trainmen started to cut out the car, but the tramps would not permit it. They were nearly all armed and drew their revolvers and made the trainmen take the car of straw through to Yuma, the end of the division west of here.

In the last sixty days fully 2,000 tramps have passed through Tucson on freight trains eastward bound.

BOLD ROBBERS.

They Plunder a Bank in the Middle of the Day.

SOUTH BEND, Ind., December 8.—The South Bend National Bank, one of the largest and soundest banks in Northern Indiana, was robbed of over \$15,000 to-day. The deed was committed in broad daylight, while hundreds of people were on the streets, and the robbers succeeded in getting away with their booty without leaving the slightest clue. Cashier Myron Campbell remained in the bank, which is located in the heart of the city, until all the employees were gone, and then, as he supposed, he locked the middle door of the big vault and left everything in the usual shape at the noon recess.

When he returned at 12:15 o'clock, ten minutes later, he found a rear window open, the back door unlocked and the door between the directors room and the counting room mutilated. The door was just as Mr. Campbell left it. They swung it back and examined the safe within. The robbers secured \$15,900. There is little doubt that the bank has been watched for several days, and perhaps weeks. It is now pretty certain that in turning the combination knob of the middle door of the vault, the one depended upon during noon hour, the cashier did not turn it far enough to scatter the tumblers. By mere chance the robbers happened to turn it the right way and unlocked the door.

"BEFORE AND AFTER TAKING."

A Girl Objects to Having Her Profile Used as Such an Advertisement.

CHICAGO, December 8.—Miss Mamie Ryan of Lake Geneva, Wisconsin, strongly objects to having her picture used in a "before and after taking" advertisement, and because, as she alleges, a certain hair professor committed this grave offense she has begun suit against him to recover \$75,000 damages. The defendant in the case claims to have an invaluable remedy for baldness, which is warranted to cure any case. Miss Ryan lost her flowing locks, and consulted the proprietor of the never-failing remedy and was quite satisfied. Afterward the professor, it is claimed, distributed circulars which showed Miss Ryan "before" and "after" using his specific. These pictures, the plaintiff alleges, were a horrible libel upon her personal appearance, and she considers she has been damaged in the amount she asks.

The Government Will Interfere.

WASHINGTON, December 8.—Acting Secretary Curtis of the Treasury Department intimated plainly that the Government would interfere should an attempt be made to give practical effect to the suggestion of Governor Waite of Colorado to make silver a legal tender and provide for free coinage at a State Mint.

Curtis said Governor Waite knew very well the United States alone has the right to coin money and that coinage by a State would be contrary to the Constitution. The Attorney-General, he added, would be asked for advice as to the proper course to take should occasion require action, which he did not think would be needed.

Trying to Raise an Army of 10,000 Men.

CHICAGO, December 8.—The Chief of Police this morning had his attention called to a peculiar circular that has been sent out by a crank at Wheaton, Ill. The circular calls for 10,000 men, armed and mounted, to meet the Wheaton man December 12th on the lake front. Just what he proposes to accomplish with the armed men the author of the circular does not state very clearly, but he says he desires to right many existing wrongs. The army which this Wheaton General proposes to muster into service is asked to report for duty on the lake front at daylight.

The officers will prevent the meeting.

A New Signal Station.

WASHINGTON, December 8.—Representative Loud has been assured by the Weather Bureau that a signal station would be established at Boca immediately. The people of Boca have been petitioning for this for some time.

Telegraph Notes.

The Torrey Bankruptcy bill was defeated in the House yesterday.

Half a million dollars in gold has been engaged for export to Germany. The sub-committee of the Banking and Currency Committee have ready a bill repealing the 10 per cent tax on State banks.

The shareholders of the Oregon Navigation Company are demanding a better representation in the affairs of the Union Pacific.

The Chilian Government has filed with the United States Government a claim for damages amounting to \$227,000 in the Itata case.

Commodore Stanton has submitted a written report of the incident of his salute of the flag of the insurgent Admiral Mello in the harbor of Rio Janeiro.

The tramps at Tucson are indignant at the recent order of the Southern Pacific Railroad prohibiting any more free rides and threaten to derail the track.

Minister Thurston has informed some friends at Washington that the Provisional Government of Hawaii has 1,100 men under arms ready to respond at a tap of a bell, and that while the Provisional Government will not seek to prevent the landing of United States marines by force, neither will it lay down its arms and leave the Government building at the request of Minister Willis.

Justice Court.

In the case of the State vs Robert Jones for misdemeanor in leaving a gate open upon the ranch of Larry Derby, which was on trial yesterday in the Justice Court, the jury found defendant guilty as charged. Sentence will be passed Monday.

Tom Monihan, whom two trials failed to convict of assault and battery, was yesterday discharged from custody.

IN OLDEN TIMES

People overlooked the importance of permanently beneficial effects and were satisfied with transient action, but now that it is generally known that Syrup of Figs will permanently cure habitual constipation, well-informed people will not buy other laxatives, which act for a time, but finally injure the system.

Prof. W. O. Pearce.

Organ registration and manipulation taught thoroughly. Organ tuning and repairing a specialty. Special attention given to beginners on the piano. Leave orders at C. J. Brookins' music store. sep6tf

Dr. C. J. Mullen.

Office on Second street, near post-office. Hours: 10 a. m. to 2 p. m. Sundays and evenings by appointment only. no28tf

The second trial of Parsons for the murder of Hamilton is being held at Carson. District Attorney Knight of Storey and District Attorney McGowan of Ormsby are prosecuting the case and Hon. W. E. Deal and Hon. William Woodburn are for the defense. A jury was impaneled late yesterday afternoon to try the case.

The weather is as pleasant as could be desired. Yesterday was more like September than December.

For Bronchitis

"I never realized the good of a medicine such as I have in mind until a few months, during which time I have suffered intensely from pneumonia, followed by bronchitis. After trying various remedies without benefit, I began the use of Ayer's Cherry Pectoral, and the effect has been marvelous, a single dose relieving me of choking, and securing a good night's rest."—T. A. Higginbotham, Gen. Store, Long Mountain, Va.

La Grippe

"Last Spring I was taken down with la grippe. At times I was completely prostrated, and so difficult was my breathing that my breath seemed as if confined in an iron cage. I procured a bottle of Ayer's Cherry Pectoral, and no sooner had I begun taking it than relief followed. I could not believe that the effect would be so rapid."—W. H. Williams, Cook City, S. Dak.

Lung Trouble

"For more than twenty-five years, I was afflicted with lung trouble, at times being so severely attacked as to cause hemorrhage; the paroxysms frequently lasting three or four hours. I was induced to try Ayer's Cherry Pectoral, and after taking four bottles, was thoroughly cured. I can confidently recommend this medicine."—Franz Hofmann, Clay Centre, Kans.

AYER'S

Cherry Pectoral

Prepared by Dr. J. C. Ayer & Co., Lowell, Mass. Sold by all Druggists. Price \$1; six bottles, \$5. Prompt to act, sure to cure.

KNOWLEDGE

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many, who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs.

Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative, effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession because it acts on the Kidneys, Liver and Bowels without weakening them and it is perfectly free from every objectionable substance. Syrup of Figs is for sale by all druggists in 50c and \$1 bottles, but it is manufactured by the California Fig Syrup Co., only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.

For Over Fifty Years

Mrs. Winslow's Soothing Syrup has been used by millions of mothers for their children while teething. If disturbed at night and broken of your rest by a sick child suffering and crying with pain of cutting teeth, send at once and get a bottle of Mrs. Winslow's Soothing Syrup for children teething. It will relieve the poor little sufferer immediately. Depend upon it, mothers, there is no mistake about it. It cures Diarrhoea, regulates the Stomach and Bowels, cures Wind Colic, softens the gums, reduces inflammation and gives tone and energy to the whole system. Mrs. Winslow's Soothing Syrup for children teething is pleasant to the taste and is the prescription of one of the oldest and best female physicians and nurses in the United States. Price twenty-five cents a bottle. Sold by all druggists throughout the world. Be sure and ask for "Mrs. Winslow's Soothing Syrup." aug24-ly

A Million Friends.

A friend in need is a friend indeed, and not less than one million people have found just such a friend in Dr. King's New Discovery for Consumption, Coughs and Colds. If you have never used this Great Cough Medicine one trial will convince you that it has wonderful curative powers in all diseases of Throat, Chests and Lungs. Each bottle is guaranteed to do all that is claimed, or money will be refunded. Trial bottles free at S. J. Hodgkinson's drug store. Large bottles 50c and \$1.

STATE OF OHIO, CITY OF TOLEDO, ss.

FRANK J. CHENEY makes oath that he is the senior partner of the firm of F. J. CHENEY & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of HALL'S CATARRH CURE. Sworn to before me and subscribed in my presence, this 16th day of December, A. D. 1893.

A. W. GLAYSON, Notary Public.

Hall's Catarrh Cure is taken internally and acts directly on the blood and mucous surfaces of the system. Send for testimonials, free. F. J. CHENEY & CO., Toledo, O. Sold by all Druggists, 75c.

BREVITIES.

Ice skates at all prices at Lange & Schmidt's.

Second-hand cooking stoves wanted. See ad.

The cash receipts for the Midwinter Fair to date are \$390,630.83.

Mrs. O. Lonkey and Mrs. Cobb were down from Verdi yesterday.

South Carolina has netted in four months \$32,108.16 on her liquor.

Rail what ex-Governor Hill suggests in another column and call at McLaughlin's and get particulars.

The election of officers for the ensuing Masonic year will be held by Reno Lodge, No. 13, F. & A. M. to-night.

Our silver is 60 1/2 cents per ounce in New York. It has reached the 70-cent mark only once since the repeal bill passed.

The train that will be enlarged by representative Wilson's bill, should it become a law, by the addition of some 450 articles.

The largest assortment of heating stoves, parlor stoves, cook stoves and ranges, cruetery and lamps at public prices at Lange & Schmidt's.

A locomotive is being constructed in England to run 100 miles an hour. It is 2,000 horse power and the driving wheels are twelve feet in diameter.

The Union Courier says the Indians had a big rabbit hunt last week and slaughtered about 2,000 rabbits. One family brought in nearly 400, and it wasn't a large family either.

Reno Chapter, No. 7, R. A. M., elected the following officers for the ensuing year: J. M. McCormack, High Priest; L. L. Crockett, King; John Kern, High Priest; H. P. Kraus, Treasurer; and W. L. Bechtel, Secretary.

The Elko Independent says F. J. Frank and J. J. Baird have discovered a vein of excellent shale at Bullion. It burns much better than the Elko shale and tests of it made at Tuscarora gave excellent results.

There is a sworn feud at the University between the Freshmen and Sophomores. A group of Freshies last week captured a stray Sophomore and shaved his downy growth from his upper lip, hence the declaration of war.

Joseph Smith of Ruby Valley tells the Elko Independent that the people of his section were well pleased with the Eastern men who bought their cattle. They received higher prices than San Francisco buyers would pay and were able to dispose of all their cattle.

Rev. George R. Cairns, a Baptist evangelist, widely known in America and England, is expected to conduct a series of revival services in the Baptist Church of Reno, beginning Sunday, December 31st. Schedule of service and detailed information will appear in due time.

Best of meats at Dixon & Bros. meat market to-day. Young beef, prime, very fine roasts of all kinds, fine farm-raised pork, lamb and veal the very best the market affords; also spare ribs, liver sausage, blood pudding and all other meats kept in a first-class market.

WEATHER BULLETIN

The Next Storm Wave—Weather Forecasts.

Copyrighted 1893 by W. T. Foster.

St. JOSEPH, Mo., December 9.—My last bulletin gave forecasts of the storm wave to cross the continent from December 10th to 14th, the next will reach the Pacific Coast about the 14th, cross the Western mountains by the close of 15th, the Great Central valleys from 16th to 18th and the Eastern States about the 19th.

This disturbance will spend most of its principal force in the western portion of the Great Central valleys.

The warm wave will cross the Western mountains about the 14th, the Great Central valleys about the 16th and the Eastern States about the 18th.

A cool wave of more than usual force will cross the Western mountains about the 17th, the Great Central valleys about the 19th, and the Eastern States about the 21st.

WEATHER FORECASTS.

Prof. Bigelow of the National Weather Bureau, claims that the sun is a solid body and that, radiating from about where the sun-spots are most numerous, magnetic forces reach out into space and effect the earth's atmosphere periodically from three directions.

One of these forces comes to the earth from above, or vertically, another from the direction in which the earth moves in its orbit and the other in straight lines from the sun. The vertical forces do not come to the earth directly from above, but at right angles from the plane of the ecliptic.

To make this more plain we will suppose a flat surface extends out all around the sun to the earth's orbit or path around the sun. That is what is called the plane of ecliptic. As the earth's axis leaves 23.5 degrees of that plane, the magnetic forces in question would not come down straight toward the center of the earth but slanting 23.5 degrees, or from a point nearly one-fourth of the distance from directly overhead to the horizon.

The force that comes from the earth's orbit or path around the sun varies in direction as regards the earth. At mid-night of June 11th, and December 11th, the force would come from the western horizon; on March 21st from 23.5 degrees south of the zenith and December 21st from 23.5 degrees north of the zenith and varying between these four points.

To understand this idea one must keep constantly in mind the direction in which the earth is moving, and from that point this second magnetic force comes to the earth.

The third force varies in direction from 23.5 degrees south owing to the position of the sun relative to the earth, summer and winter. These are the three magnetic forces to which Prof. Bigelow ascribes all the changes in our weather.

He further claims that these three magnetic forces pulsate, or throb, six times in 24.68 days and this latter period he believes to be the time occupied by the sun in making one synodic rotation on its axis. By synodic is meant that the same part of the sun rotates around and comes to the same position relative to the earth which is nearly equal to one and one-twelfth rotations of the sun on its axis, because the earth is moving in the same direction in which the sun rotates.

Starting with the principle one of these pulsations, it is claimed that the second, a minor influence, occurs, not in three days but within the third day; also on the 6th, 11th, 18th, 17th and 26th days. This 26th day is the same as the starting point, or the first disturbance or the disturbances are repeated on the 3d, 6th, etc. days as before.

THE STARTING POINT

For these calculations is 12.22, 1887 and for 1894 it will be January 7.32; that will be about the same as 8 P. M. of January 8th. Prof. Bigelow is intensely scientific, and I suppose he uses astronomical time which begins at noon, or at the end of the twelfth hour of the civil day.

Taking the above as a starting point for January, the magnetic or storm disturbances would occur on January 8th, 11th, 14th, 19th, 25th, and on February 4th. This last date is at the very beginning of the 4th, or immediately following 12 noon of that day.

PROFESSOR BIGELOW'S THEORIES.

There are three million people in the United States who regularly receive my weather bulletins through the public press, and of these there are many thousands who are competent to investigate these questions. Let Prof. Bigelow's theories have a fair hearing, and that I may I have carefully interpreted his hard scientific terms.

But there is one thing lacking in his system; he fails to indicate where the atmospheric disturbances are to begin. He has given the time, but not the place. In these latitudes the atmospheric disturbances move across the continent in four or five days and around the earth in twenty-three to twenty-nine days, therefore we must know the starting place of the disturbance as well as the starting time or all practical results will be lost.

Prof. Bigelow acknowledges this difficulty. His disturbance dates are very close to those that I have used for eighteen years, but I have starting places as well as starting times, epochs, he would call them. The storms that move through these latitudes start from the Behring Sea, perpetual barometer about nine days before they reach the middle of this continent, and the storms of Northern Europe and Northern Asia emerge in like barometer from the perpetual low barometer whose center is near Iceland.

Highest of all in Leavening Power.—Latest U. S. Gov't Report.

Royal Baking Powder

ABSOLUTELY PURE

COAL IN ESMERALDA COUNTY.

What the Discoverer Desires to Know About It.

"Prospector" writing to the JOURNAL from Columbus, Esmeralda county, says he has been informed that the Central Pacific Railroad Company offers a reward to anyone finding a good, workable coal mine in the State of Nevada. He desires to know if such is the fact, as he has found and opened a coal vein of large size twenty miles southeast from Candelaria. The coal is hard, of good quality and is claimed to burn freely.

The Central Pacific Company has not, so far as known to the public, offered a reward for the discovery of coal in Nevada, though possibly if a coal mine should be discovered anywhere along the line of their road in the State they would pay a good price for it. They would not, however, be likely to pay a reward for the discovery of coal 200 miles away from their road. If "Prospector" has made such a discovery as he describes, no doubt the Carson & Colorado Railroad Company would pay him well for it, as it would be of incalculable benefit to the road and the country along the road.

A SINGULAR ACCIDENT.

A Lady Seriously Injured by a Pair of Scissors.

Last Wednesday says the Elko Independent as Mrs. A. D. McRae of Carlin, was busily engaged in sewing, her scissors accidentally dropped from her lap and one point struck her right shoe penetrated the cloth but not touching the foot. A short time after she hastily rose to go to the door when the scissors spread and her left foot struck them driving the point into the instep and cutting a gash to the bone nearly two inches in length. She immediately dressed the wound and on Thursday was able to touch her foot to the floor and the wound had apparently healed.

Saturday it began to pain her badly and Dr. Handerson was telegraphed for and went down on the 3:30 train Sunday morning. The doctor pronounced it a case of blood poisoning and lanced the wound. Mrs. McRae continued to grow worse and yesterday was brought up and placed under doctors care. She is resting comfortably at the Humboldt House and is in a fair way to recovery.

MIDWINTER FAIR EXHIBIT.

Eastern Counties Moving—Lander Appropriates \$500.

Secretary Stoddard of the State Board of Agriculture received a letter from Treasurer T. H. Dalton of Lander county informing him that the Board of County Commissioners at their meeting last Monday appropriated \$500 for the Midwinter Fair exhibit, and that the money would be paid the State Board by District Attorney Jones, who is coming to Reno in a few days.

Lander is the first county in the State to make an appropriation for the State exhibit, but the other counties are moving in the matter. Elko Commissioners say they will appropriate \$1,000 for the exhibit if a majority of the taxpayers petition to that effect. Humboldt is also in line with the movement and has appointed committees to collect exhibits. White Pine, Nye and Lincoln are also taking active interest in the matter, and, no doubt, will contribute to the general fund and send samples of their products for the exhibit.

At the Opera House.

"Don Cesar de Bazan" at the opera house last evening drew a fairly good house. Richard Foote was suffering from a severe cold and was far from being at his best, but sustained the character of the happy-go-lucky Don Cesar so excellently as to win much applause.

This afternoon a matinee will be given at the opera house, and several short farces presented. Admission, 25 cents.

To-night "Hugo, the Hunchback," will be played.

Cost to the County.

"The Gazette" shares the belief pretty generally prevalent about town that the cost of prosecuting Monihan, the prize fighter, is costing the county more money than will follow in results.

Inquiry at the Justice's Court revealed the fact that the costs of Monihan's trial aggregated exactly \$36.20, including board of prisoner, Constable and Justice's fees and costs of issuing subpoenas. If the case was taken up by the Grand Jury for one day it would cost the county \$53, exclusive of the cost of summoning jurors and their mileage.

THE FRESHIES WON.

A Cold Day for the Pink Ribbons at the State University.

The event at the State University yesterday was the baseball game between the Freshmen and Sophomores. Six innings were played, resulting in a score of thirteen to eleven in favor of the Freshmen. Captain Jerome Higgins managed the Freshmen and A. W. Cahlan the Sophomores. The success of the Freshmen was due largely to the pitching of L. C. Stephens.

A large number of persons, principally students, witnessed the game. Each of the spectators wore the class color of the side upon which his or her sympathies rested, and great enthusiasm was manifested.

Creamery Butter.

How many readers have seen a creamery in action, and know exactly how butter is made by the method that has taken the place of that once in vogue in every farmer's dairy? At Stowe, Vt., is a good specimen of these "new-fangled" ways of treating cream, and one who wishes to spend a forenoon in the pleasant survey of an interesting work will find himself repaid for seeking out this cool clean building in a lovely town, says a writer in the Youth's Companion.

First of all, unless the creamery is a co-operative one, the milk must be bought, and in any case the farmers for miles around must bring or send in their milk. Generally all the milk that a farm produces is sent. Sometimes the creamery uses over 4,000 pounds a day, a "pound" of milk usually filling a "scanty" pint.

The milk is not paid for by the measure, for that would be most unjust. The man who has Jersey cows would not receive no more than the owner of animals which are "large milkers," but whose milk is of poor quality. So the milk is tested by the use of an acid, and paid for according to its percentage of butter-making quality.

Early in the morning this new milk is made to flow steadily into a receiver, and there it comes in contact with a cylindrical vessel which is whirling at the rate of 4,000 revolutions a minute. The motion has the effect of separating the cream from the milk; as the milk is heavier, it falls to the outside of the vessel, where it is carried off by a pipe, and the cream being lighter, seeks the center, exactly as the foam of a whirlpool is always thrown to the middle of the circle.

A metal rim, rising between the two fluids, serves to keep them permanently apart, and the cream, like the milk, is carried off by a pipe of its own. It flows into a large oblong tank in the next room, and then protected by a thin cloth from dust and flies, it stands for forty-eight hours, since butter has a richer taste if the cream is allowed to "ripen" a little.

The enormous churn which receives the cream when it is ready for the second process is in the shape exactly like those used by many a farmer's wife, and turns bodily with every revolution; it is, however, moved by steam power, and not by "elbow grease," and the buttermilk is finally drained off through the floor into enormous vats.

And when the butter has "come" what delight to see it worked! Great yellow masses, usually about sixty pounds in quantity, are spread in a broad circle upon a round table. Immediately over this table are two grooved wooden rollers, and when the table is set in motion by machinery, it slowly turns about under the rollers, which are at the same time revolving. Thus the buttermilk is quickly and effectually pressed from the mass, and it lies out ready for salting.

As the table turns a woman shakes over the butter fine salt from a sieve, an ounce of salt to a pound of butter, and when a few more revolutions of the rollers have worked it in, the butter, is made.

It is then rapidly put into small tubs, covered with a cloth and a thick layer of salt, or made into beautiful regular pats. These pats, each weighing a pound, marked with quarter-pound divisions, are rapped up in white paper and then placed in a very ingenious receptacle, formed of thin wood, made so as to bend in the proper places and form a little box.

When one views the cleanliness and precision which goes with this work, done on so large a scale, he cannot help being convinced that the creamery has not destroyed the poetry which still clings about the life of the dairy.

Hot lunch at Kerth's every day, 15 cents.

Awarded Highest Honors at World's Fair.

DR. PRICE'S Cream Baking Powder

The only Pure Cream of Tartar Powder.—No Ammonia; No Alum. Used in Millions of Homes—40 Years the Standard.

THE NEVADA BUILDING.

Plans Completed and the Contract for Construction About to be Let.

The San Francisco Chronicle of the 7th inst., in addition to a cut of the Nevada State building at the Midwinter Fair, contains the following:

"Plans were completed yesterday for a State building and the contracts for its erection are to be held at once. The building is 50x60 feet and will stand directly opposite the frontier theater. The State building, the mining camp and the theater all running in conjunction will surely attract attention to Nevada. From the plans the building will present quite an imposing appearance. The front is adorned with alternate pillars of silver and gold, with lattice work between. On top will be erected a summer garden or cafe.

"This is to be a light but durable structure protected by awnings, and with a grove of small palms growing on the roof. Meals and other refreshments will be served in the cafe."

EX-GOVERNOR HILL

Suggests that Grover Cleveland isn't in it, but that W. P. McLaughlin publish the following price list:

16 lbs Island rice for \$1.00
9 cans best tomatoes for 1.00
7 cans corn for 1.00
8 cans assorted pie fruit for 1.00
8 cans beans for 1.00
7 cans sugar peas for 1.00
6 cans table fruit for 1.00
1 box pale savon soap for 1.00
Best roast coffee 3 lbs for 1.00
6 cans jelly for 1.00
10 lb sack corn meal 35c
2 lb can Dixie's cream 30c
2 lb can blueberries 25c
Gold Medal flour, best in the world \$2.40 per 100 lbs.

Just received "Hickory Nuts," Pop Corn, Maple Syrup, destd

Live Lettuce.

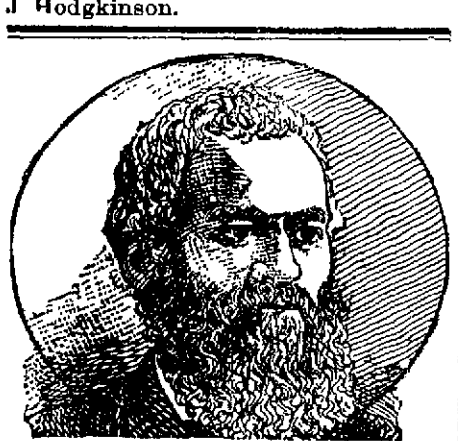

It is good advice, but live carefully is better. In both these cases Simmons Liver Regulators will help you live best. They keep the liver active, the bowels regular, and helps throw off the poison in the system which causes Malaria and Rheumatism. The Regulator also promotes digestion and never fails to relieve the most severe cases of Dispepsia, Constipation and Biliousness.

Deserving Praise.

We desire to say to our citizens that for years we have been selling Dr. King's New Discovery for Consumption, Dr. King's New Life Pills, Bucklen's Arnica Salve and Electric Bitters, and have never handled remedies that sell as well, or that have given such universal satisfaction. We do not hesitate to guarantee them every time, and we stand ready to refund the purchase price if satisfactory results do not follow their use. These remedies have won their great popularity purely on their merits. S. J. Hodgkinson, druggist.

Bucklen's Arnica Salve.

The best salve in the world for Cuts, Bruises, Scars, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains, Corns, and all skin Eruptions, and positively cures Piles or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by S. J. Hodgkinson.

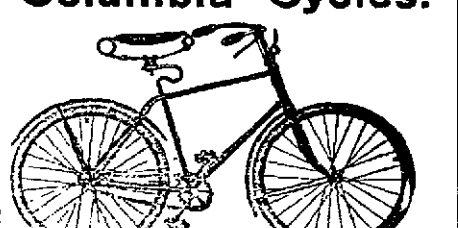

Mr. Geo. W. Twiss

All Run Down
"A few years ago my health failed, and I consulted several physicians. Not one could clearly diagnose my case and their medicine failed to give relief. I commenced to take Hood's Sarsaparilla. From an all run down condition I have been restored to good health."

Hood's Sarsaparilla Cures
Formerly I weighed 135 pounds, now I balance the scales at 176 pounds. Geo. W. Twiss, Colorado, Vaishara Co., Wis.

Hood's Pills cure all Liver Ills, Sick Headache, Jaundice, Indigestion. Try a box. 25c.
